	7	The system saves the service description in the user's profile.
	8	The system enables the promotion of the service in the Marketplace.
	9	The system displays a confirmation message to the user.
Exceptions	Step	Action
	1	Mandatory data is missing. The system informs the user which data is missing.
	2	Error saving the service description. The system displays an error message.
	3	Error when enabling service promotion. The system displays an error message.
Postcondition	If everything is correct, a confirmation screen will appear.	
Importance	Vital	
Urgency	Immediate	
Comments	Subject to change	

06	Review user reviews	
Version	Version 1.0	
Authors	Axel Morales	
Associated requirements	RI-01 Interface	
Description	The system should behave as described in the use case below when a user wants to review reviews.	
Precondition	The user must have valid credentials.	
Normal sequence	Step	Action
	1	The user indicates that he/she wants to see reviews about your service.
	2	The system displays the list of reviews left by other users about the user's service.
	3	The user can select a review to view its details (review text, date, rating given).
	4	The user can filter reviews by rating, date or other criteria.
	5	The system sorts and filters the reviews according to the criteria selected by the user.
	6	The user reads and reviews reviews about your service.
Exceptions	Step	Action
	1	There are no reviews about the service yet.
	2	The system displays an information message.
	3	Error when filtering or sorting reviews. The system displays an error message.
Postcondition	If everything is correct, you will be able to see the reviews.	
Importance	Vital	

Urgency	Immediate
Comments	Subject to change

07	Share your proximity with other tourists	
Version	Version 1.0	
Authors	Axel Morales	
Associated requirements	RI-01 Interface	
Description	The system shall behave as described in the use case below when a user wants to share its proximity.	
Precondition	The user must have valid credentials.	
Normal sequence	Step	Action
	1	The user indicates that he/she wishes to share his/her proximity with other tourists.
	2	The system prompts the user to activate the proximity and location sharing service.
	3	The user authorizes the system to access his current location.
	4	The system adds the user's current location to their public profile.
	5	The user's location is now visible to other nearby tourists.
	6	The system shows the user a list of other nearby tourists who also shared their location.
	7	The user can disable proximity sharing at any time.
Exceptions	Step	Action
	1	The user does not authorize access to his location. The use case is cancelled.
	2	Error when adding the location to the public profile. The system reports the error.
Postcondition	If everything is correct, the proximity of nearby users can be displayed.	
Importance	Vital	
Urgency	Immediate	
Comments	Subject to change
